

Data Tracking Release Form

The Vermont Family Court Mediation Program, which offers subsidized mediation services to income eligible clients, is asking for your help in tracking the effectiveness of divorce mediation. Our program will be using only information available in court files, which are public record, to see if the use of mediation results in fewer motions being filed in family court. If you are willing to help us in this important research project, please sign below.

I AGREE and understand that my name and/or court docket number will be made available to the Vermont Family Court Mediation Program for research purposes.

Details of the mediation session shall remain confidential and will not be disclosed by the mediator.
